

ANACONDA/ JUPYTER NOTEBOOK INSTALLATION

Now, we have to download Anaconda which will give us the leverage to use Anaconda in Jupyter Notebook. For me I'm Downloading Anaconda steps are given

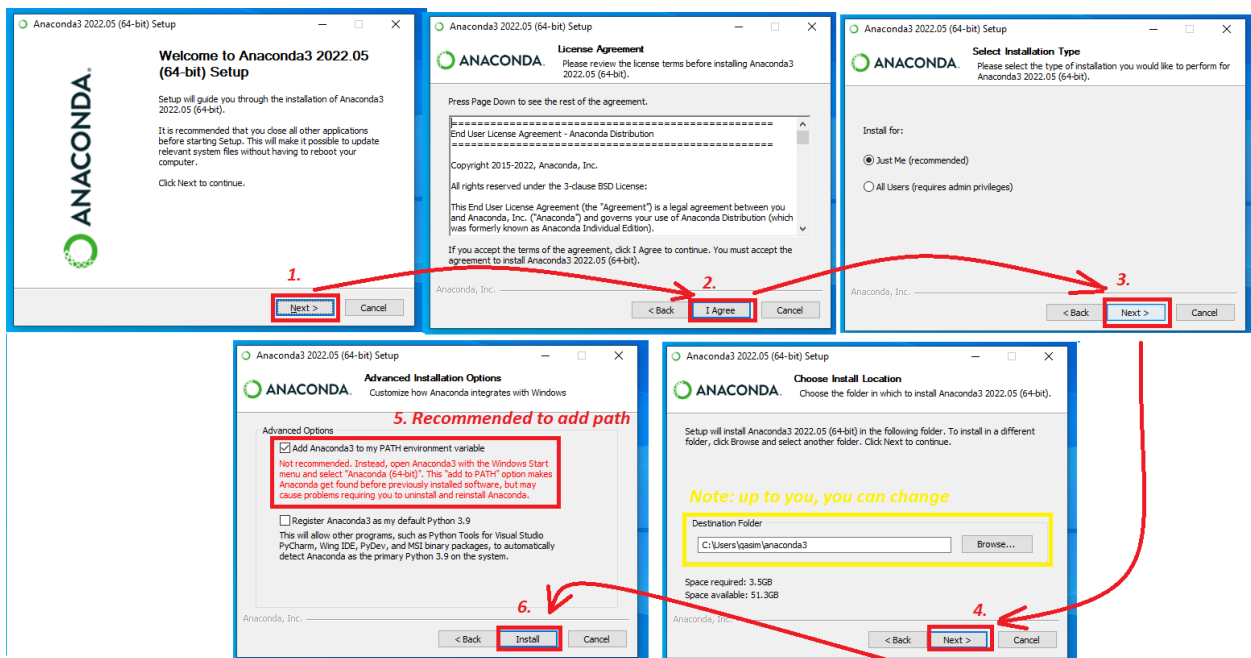

- First navigate to Anaconda website & download an Anaconda Distribution for Windows as shown in Fig22below:

- After Clicking on Download, downloading will start as shown in Fig23

- Now, follow the following Fig24 for complete anaconda installation.

(Validating the Installation)

- Let's check Python version through command prompt if our Anaconda is successfully installed it will give us python version as shown in Figure24 for me showing successful installation of anaconda.

```

C:\Windows\system32\cmd.exe - Pyspark
Microsoft Windows [Version 10.0.19044.1706]
(c) Microsoft Corporation. All rights reserved.

C:\Users\qasim>Python --version
Python 3.9.7
  
```

- Let's activate the conda based environment as shown in Fig26 below with the help of command >>> **conda activate base**

```

C:\Users\qasim>conda activate base

(base) C:\Users\qasim>Python --version
Python 3.9.7
  
```
